

Foster Care Centers of Excellence

What is a Center of Excellence (COE)? Centers of Excellence are medical centers that have expertise in more than one area of medical service. They are created for youth in the child welfare system.

Foster Care COE's goal is to make health care easier. Children and youth in foster care and adoption support can see high quality, trauma-informed primary care providers. These providers understand the needs of child welfare involved families.

Services available include:

- An initial 5 day Health Risk Exam and an EPSDT within 30 days of entering care
- Referrals to specialists like Physical Therapy, Speech Therapy and Occupational Therapy
- Referrals to vision and dental services
- Prescriptions
- Assistance with getting Durable Medical Equipment
- Behavioral services (Individual therapy, Group therapy, Cognitive Behavioral Therapy, etc.)
- Lab tests and x-rays

Foster Care COEs team up with Coordinated Care of Washington, Inc. COEs refer patients to Coordinated Care Health Care Coordination for support as needed or COEs provide the services at the clinic. The COE meets regularly with DCYF and Coordinated Care.

How to Refer

Excelsior/Family Care Spokane COE

Address:

9631 N Nevada St , Ste 202
Spokane, WA 99218
